

STATIC ROUTE

Network Topology

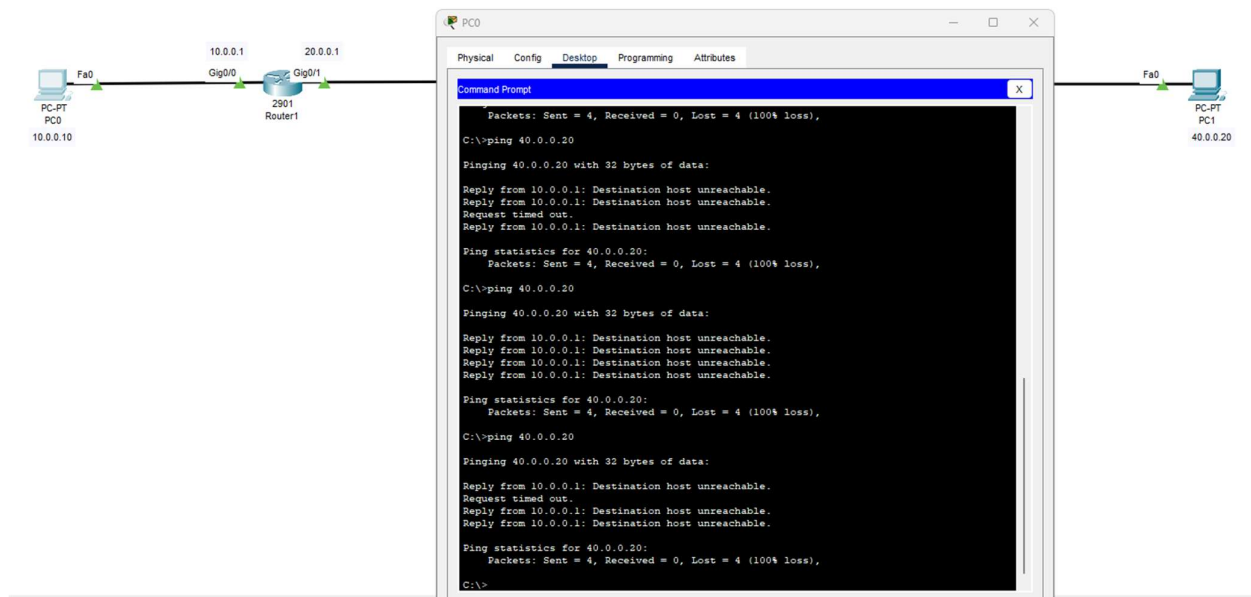

IP Route Configuration in all the routers and verify

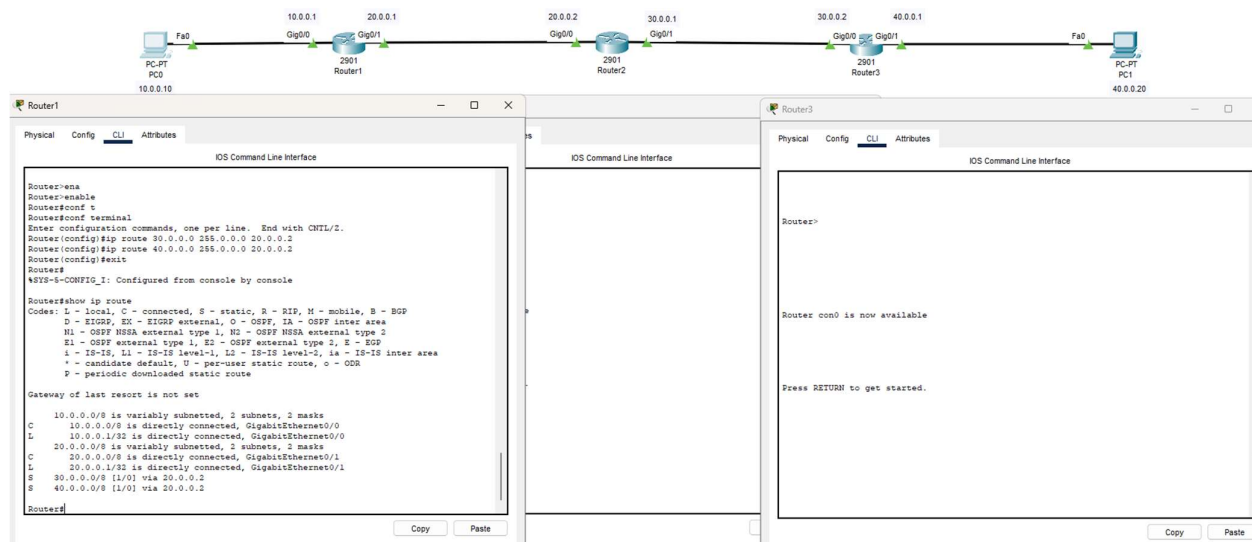

Ping from PC1 (10 network) to PC2 (40 network) – Test the network reachability

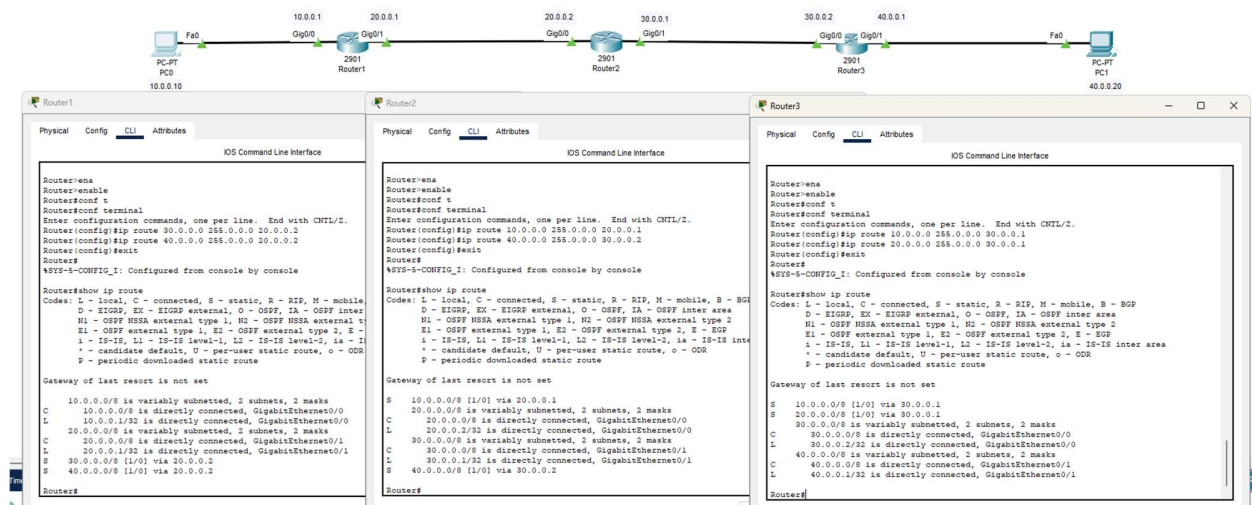

Error -Reply from 10.0.0.1: destination host unreachable

To solve the destination, host unreachable add missing network as static route in all three routers.

And confirm all the static routes are available in all three routers

Now Ping from PC1 (10 network) to PC2 (40 network) And PC2 (40 network) to PC1 (10 network)

Test the network reachability
